

Bush Quantum Desks a Quantum Leap for Business

Contributed by JNelson

Bush announced its new line of Quantum desks which are designed for small businesses with 1-99 employees. The new line of Bush Quantum desks are highly durable and feature their Exclusive Diamond Coat worksurface which feature superior scratch, abrasion and stain resistance with enhanced visual depth and clarity.

Bush has also designed their Quantum desks to increase the speed of installation. In fact, they are four times faster to put together than typical ready to assemble furniture, as verified by Edison Testing Labs. Also all items have been packaged, so they can be shipped via UPS with some pieces such as the mobile pedestal that come assembled.

The Quantum series desks have a nice modern feel to them and come in two stylish colors which include modern cherry and harvest cherry.
