

LockState Safes, Locks Now Available from BuyOnlineNow.com

Contributed by bherman

BuyOnlineNow is proud to announce the addition of LockState Safes and Locks to its online selection.

LockState offers a wide selection of high quality mechanical and electronic keyless entry door locks for almost any application. Their complete line includes front door locks, remote controlled deadbolt locks, interior door locks and more. The LockState selection of safes includes small cash & jewelry safes, closet safes, wall safes, laptop safes & fireproof safes. These safes are perfectly suited for a variety of applications including home, hotel & hospital use.

LockState's new ResortLock allows property owners to control access to the property from anywhere in the world. Guests are given a temporary code that will allow entry only during a specified length of stay, at the end of which the code expires and can never be used again. These temporary access codes are generated via free software included with the lock. The ResortLock requires no internet connection or direct connection to your computer, freeing owners to grant property access even if they are thousands of miles away. Visit our LockState Safes and Locks store to shop these quality LockState products. They're in stock for fast delivery right to your door.
